

1. Match the words with the correct meanings.

- a) **keep, save:** store
- b) **execute, do:** perform
- c) **monetary:** financial
- d) **screen:** monitor
- e) **integrated:** built-in
- f) **connected to the internet:** online
- g) **collection of facts or figures:** data
- h) **describes information that is recorded or broadcast using computers:**
digital
- i) **program used for text manipulation:** word processor
- j) **copy files from a server to your PC or mobile:** download

2. Use the appropriate collocations to complete the sentences.

- a) Thanks to Wi-Fi, it's now easy to access databases from cafés, hotels, parks and many other public places.
- b) Online banking lets you transfer money between your accounts easily and securely.
- c) Skype is a technology that enables users to make calls over the Internet for free.
- d) In many universities, students are encouraged to give presentations using PowerPoint in order to make their talks more visually attractive.
- e) The Web has revolutionized the way people do research – with sites such as Google and Wikipedia, you can find the information you need in seconds.
- f) Cookies allow a website to store information on a user's machine and later retrieve it; when you visit the website again, it remembers your preferences.
- g) With the latest mobile phones, you can send texts , with multimedia attachments - pictures, audio, even video.

3. Label the elements of this computer system.

1. CPU
2. DVD
3. USB port
4. Router
5. Keyboard
6. Mouse
7. CD ROM
8. Printer
9. Monitor
10. Webcam

3.1. Define each of them.

1. **CPU** – is the processor chip that performs the basic operations of a computer.
2. **DVD** – is the disc that uses optical technology to store large amounts of audio-visual material.
3. **USB port** – is a USB socket on a computer device into which you can plug a USB cable.
4. **Router** – is a device used to transmit data between two computers or networks.
5. **Keyboards** – is a set of keys on a terminal or computer.
6. **Mouse** – is a small input device used to specify the cursor or to make choices from menus.
7. **CD ROM** – is a CD that you cannot change data stored on it.

8. Printer – is an output device which converts data into printed form.

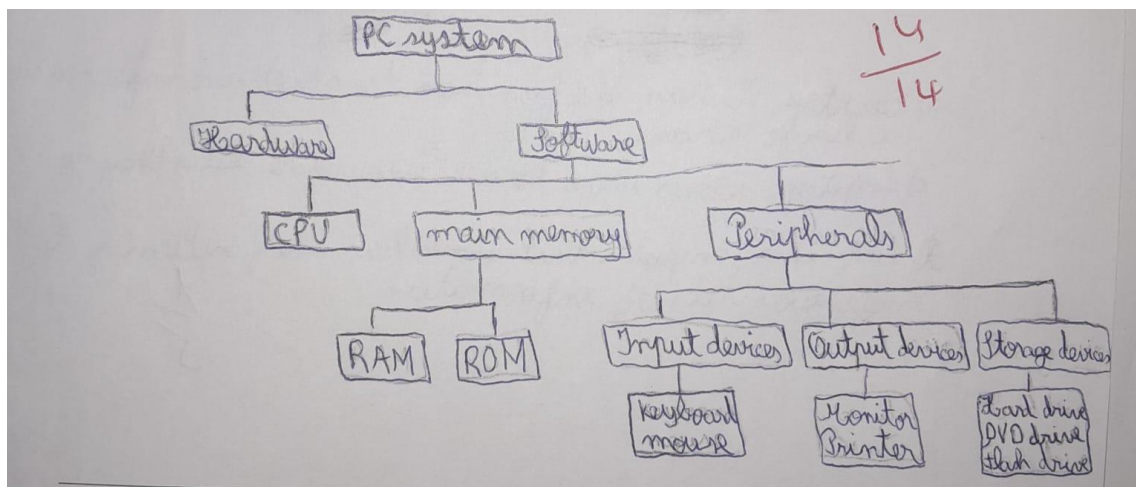

9. Monitor – is an output device with a screen on which pictures or words can be shown.

10. Webcam – is a web camera used to send live video images via the Internet.

11. Storage devices – provide a permanent storage of both data and programs.

12. Disk drive - are used to read and write data on disks.

4. Diagram of PC System.

5. What is a computer?

Computer is an electronic machine which can accept data in a certain form, process the data, and give the results of the processing in a specified format as information.

6. Label the pictures and describe the function of each them.

- a) Desktop PC –
- b) Tablet PC -
- c) Laptop -
- d) Mainframe -
- e) PDA –

7. What are the main parts of the CPU?

Control unit, ALU and registers.

8. What does ALU stand for? What does it do?

ALU stands for Arithmetic Logic Unit and performs mathematical operations and logical operations.

9. What difference is there between applications software and operating systems?

The main difference between applications software and operating systems is that applications software does not communicate directly with the hardware, but the operation system does.

10. Why is the supervisor program the most important operating system program?

The supervisor program is considered the most important operating system program because it controls the entire operating system, and loads into memory other operating system programs from disk storage only as needed.

11. What is the difference between resident and non-resident programs?

Resident programs remain in computers memory but non-resident doesn't. It is loaded when is needed.

12. What are the main functions of an operating system?

The main functions of an operating system are to manage the computer's resources (establish a user interface, and execute and provide services for applications software. Additionally, the operating system handles input and output operations, which are invoked by applications programs but carried out by the operating system itself.

13. What is a word processor?

Word processor is an application that manipulates text and produces documents suitable for printing.

14. What kind of tasks do people use word processors for?

People use word processors to:

- Compose, edit, format and print any sort of printable material

15. How many different word processing programs can you name? Which do you think is the most important?

Google Docs

Microsoft Word

WPS Office

WordPad

16. Complete the texts with the correct features.

16.1. The standard Toolbar lists the icons to save or print a document, spell check, etc. The formatting Toolbar is the area for changing font, alignment, indentation, etc.

16.2. A font consists of three elements: type face, type style and type size.

16.3. Indent buttons.

16.4. Header and footer.

17. What is multimedia?

Multimedia is the integration of text, graphics, audio, video and animation in a single application.

18. What types of content are combined in multimedia applications?

Hypertext, hypermedia and interactivity.

19. What is spreadsheet?

Spreadsheet is a program for financial planning which allows the user to analyse information presented in tabular form, by manipulating rows and columns.

20. What are spreadsheets used for?

Spreads are used in business for financial planning, to make calculations, to keep a record of the company's accounts.

21. Complete the text.

1 First, **select** the text you wish to copy. To select text, **drag** the mouse over the portion of the text that you want to copy. This part should then be highlighted.

2 Then **click** invisible clipboard. on the Copy icon on the Standard Toolbar. This copies the selected text to an

3 Next, **position** the cursor where you want the text to appear.

4 Finally, **click** the Paste icon. This inserts the content of the clipboard at the insertion point. As well as the icons on the toolbar, you can use the keys Ctrl+C for Copy, and Ctrl+V for Paste. These options also come up if you **right-click** the selected text.

22. What is an ICT system?

ICT system is a diverse set of tools and resources consisting of hardware, software, data and the people who use them, used to transmit, store, create or share information.

23. Make a list of the types of ICT system.

A computer network
Fax services
Teletext
Radionetwork

24. How can a PC be connected to another computer?

By using a Local Area Network.

25. Choose the best choice.

1 This network typically consists of two or more local area networks, covering a large geographical area.

- a. LAN b. WAN c. Intranet

2 This type of network does not have a dedicated server all the computers are independent

- a. peer-to-peer b. client-server c. Metropolitan Area Network

3. On this topology, all devices are connected to the same circuit, forming a continuous loop

- a star b. bring c. bus

4 The language used by computers to communicate with each other on the Internet is called

- a Ethernet b. ADSL c. TCPAP

5 Which cables are used to transfer information for the Internet over long distances at high speeds?

- a. telephone lines b. Ethernet cables c. fibre optic cables

6 Which device allows several computers on a local network to share an internet connection?

- a. an ADSL port b. a router c. an Ethernet port

7 Which device serves as a common connection point for devices in a wireless network?

- a. wireless access point b. wired router c. wireless adapter

8 Bluetooth is a wireless technology that uses radio waves to transmit data over

- a. long distances b. medium-range distances c. short distances (ten metres or less)

26. What is the meaning of:

- a) LAN – Local Area Network
- b) WAN – Wide Area Network
- c) MANs – Metropolitan Area Networks
- d) PANs – Personal Area Networks

27. Complete the numbers.

- 1- Teletext
- 2- Fax
- 3- Call centre
- 4- GPS
- 5- Digital TV
- 6- Digital radio
- 7- Wearable computer

28. Complete these sentences with words and phrases from B and then read the text on page 136 to check your answers.

1. Digital Audio Broadcasting, or DAB, is the technology behind **digital radio**. DAB is intended to replace FM in the near future.
2. **Wearable computer** are designed to be worn on the body or integrated into the user's clothing.
3. Most existing TV sets can be upgraded to **digital TV** by connecting a digital decoder.
4. My grandfather is 75 and he still watches **telex** on TV to find out share prices, weather forecasts and sports results.
5. I work in a **call centre** outgoing calls for telemarketing. I receive incoming calls with information inquiries. I also make outgoing calls for telemarketing.
6. Please complete this form and send it by **fax** or normal mail.
7. I have a **GPS** navigation system in my car but I don't use it very often. My town is small and I know it well.

29. Explain the meaning of the following:

- a) **MIDI** – Musical Instrument Digital Interface
- b) **DAW** – Digital Audio Workstation
- c) **SMS** – Short Message Service
- d) **DVD** – Digital Versatile Disc
- e) **URL** – Uniform Resource Local
- f) **DBMS** – Database Management System

30. Why do companies have websites?

Companies have websites in order to promote projects and advertise products.

31. What is the difference between a website and a web page?

Website – is a collection of web pages, set up by an individual or an organization, which are usually stored on the same server.

Web page – is an individual document on the Web, identified by its own unique URL.

32. What is a home page?

Home page is the introductory page that tells visitors what information is contained on a website.

33. Complete the following:

- a) The language used to create web documents HTML
- b) The type of software that lets you design web pages without writing HTML codes. web editor
- c) The format invented by Adobe to distribute text files over the internet. pdf
- d) A method of displaying multiple HTML documents in the same browser window. frames
- e) Three common graphics format used on websites. jpg, gif, png
- f) Three popular formats used to store or format video. avi, mov, mpg

34. Read the text again and then match the sentence beginnings (1 - 6) with the correct endings (a - f)

- 1 Instructions in HTML
- 2 Cascading Style Sheets are the way
- 3 A hyperlink is any clickable text,
- 4 A plug-in is a small program
- 5 Java applets are used to provide
- 6 RSS feeds are summaries of web content

-
- a image or button that takes you to another place on the Web.
 - b used for handling audio, video and animation files.
 - c are called tags.
 - d interactive features to web applications

e to define the presentation of web pages, from fonts and colours to page layout
f published in the Really Simple Syndication format for download

1	2	3	4	5	6
c	e	a	b	d	f

**35. Complete these sentences with suitable modal verbs from the HELP box.
There may be more than one possible answer.**

- a) With Java, I can include some attractive banners on my website.
- b) With a web editor, you can create a web document easily.
- c) These days, you needn't learn how to use complicated HTML codes.
Modern web design software is user-friendly and converts a visual layout into HTML code.
- d) Once live, you should update your website regularly.
- e) To view a PDF file, you must have Adobe Acrobat Reader.
- f) Websites with graphics are more inviting than those written in plain text, so you may like to insert some graphics into your documents
- g) Can I use your laptop? I need to print out this report.

36. Match with their meanings.

- a) **HTML** – Hypertext Markup Language
- b) **PDF** – Portable Document Format
- c) **CSS** – Cascading Style Sheets
- d) **JPG** – Joint Photographics Experts Group
- e) **GIF** – Graphics Interchange Format
- f) **PNG** – Portable Network Graphics
- g) **WAV** – Windows Wave Audio Format

- h) RA** – RealAudio File
- i) AVI** – Audio Interlive
- j) MOV** – QuickTime Movie
- k) MPG** – Moving Pictures Experts Group

37. Answer the following.

1 the advantages and disadvantages of optical discs over magnetic disks

Advantages: can store data at much higher densities than magnetic disks.

Disadvantages: are slower than hard drives.

2 the storage capacity of a double-sided, dual layer DVD

17 GB

3 the difference between a DVD burner and a DVD recorder

A DVD burner is a DVD computer drive that records data on DVDs.

A DVD recorder typically refers to a stand-alone unit, similar to a video cassette recorder.

4 the feature of a portable DVD player which allows the user to play different formats

Multi-format playback

5 two possible successors to DVDs

HD-DVD and Blu-ray

6 where the Blu-ray format gets its name from

Uses a blue-violet laser

	Capacity	Format	Possible uses
CD	650 – 700 MB	CD ROMs	To include a dictionary or game
		CD-R	To duplicate music and data CDs
		CD-RW	To back up important files
DVD	4.7 GB or 17 GB	DVD-ROMs	To sell interactive content
		DVD-R	To back up information
		DVD-RW	To back up data files and to record audio and video
Blu-ray	25 GB/50GB/100GB		To record and play high-definition TV, audio and computer data

38. What can of devices could be helpful for disable people?

Adapted keyboard, headphones and screen reading software.

39. Decide whether these sentences are true or false.

- 1 A hard drive spins at the same speed as a floppy disk drive. **False**
- 2 If you format a hard drive that has files on it, the files will be deleted. **True**
- 3 Hard drives cannot be partitioned to run separate operating systems on the same disk. **False**
- 4 Seek time and transfer rate mean the same thing. **False**
- 5 Disk drives are not shock resistant, especially in operating mode. **True**

40. Match these words (1-5) with the definitions (a-e).

1 formatted

2 directory

3 read/write head

4 head crash

5 back up

a a file system that defines the structure for keeping track of the files

b the part of a drive that reads and records data on a disk

c to make a copy of data or software in case the original disk is damaged

d initialized, when the tracks and sectors on magnetic disks are set

e a serious disk malfunction; when the read/write head touches the rotating disk

1	2	3	4	5
d	a	b	e	c

41. Why is videoconferencing so useful for virtual workgroup?

It enables virtual workgroups to communicate easily over long distances.

42. Match the descriptions (1-8) with the names of the keys (a-h). Then find them on the keyboard.

1 A long key at the bottom of the keyboard. Each time it is pressed, it produces a blank space. **Space bar**

2 It moves the cursor to the beginning of a new line. It is also used to confirm commands. **Return/enter**

3 It works in combination with other keys. For example, you press this key and C to copy the selected text. **Ctrl**

4 It removes the character to the left of the cursor or any selected text.
backspace

5 It produces UPPER CASE characters. **Shift**

6 It produces UPPER CASE letters, but it does not affect numbers and symbols.
Caps Lock

7 It moves the cursor horizontally to the right for a fixed number of spaces (in tabulations and data fields). **Tab**

8 They are used to move the cursor, as an alternative to the mouse. **Arrow keys**

43. Complete these descriptions with the correct unit of memory.

1. A **terabyte** is about one trillion bytes – about as much text as the books and the magazines in a huge library.
2. A **megabyte** is about one million bytes – about as much text as 300-page novel.
3. A **kilobyte** is about one thousand bytes – equivalent to one sheet of A4.
4. A **gigabyte** is about one billion bytes – about as much text as 1,000 books.
5. A **byte** can store a single character, such as the letter h or number 7.

44. Match the words (1-6) with the words (a-f) to make technical terms from the text.

- | | |
|----------------|-------------|
| 1. Java | a. applet |
| 2. Operating | b. page |
| 3. Programming | c. code |
| 4. Web | d. system |
| 5. Source | e. object |
| 6. Graphical | f. language |

1	2	3	4	5	6
a	d	f	b	c	e

45. Complete the sentences with the words from the box.

interpreted	animated	configured	used	pronounced	object-oriented	compiled
-------------	----------	------------	------	------------	-----------------	----------

1. Java lets you watch **animated** characters on web pages.
2. Java is an **object-oriented** language, similar to C++ but more dynamic.
3. First, the source code of a Java program is **compiled** into an intermediate format called bytecode. This is then **interpreted** by any system possessing a Java interpreter.
4. The Java ME platform is widely **used** in mobile devices.
5. Nowadays, most mobile phones are **configured** to use Java games.
6. Microsoft's C# is a simplified version of C and C++ for the Web. It's **pronounced** "C sharp".

Multichoice questions

1. Magnetic Device used to store information.

- a) SD Card
- b) Flash
- c) main memory disk
- d) Hard drive

2. When a System is easy to use, it is called

- a) Perfect System
- b) Best Interface
- c) User-friendly
- d) Microsoft Windows

3. Which of these sentences are true?

- a) Spreadsheets cannot be used as databases
- b) You cannot change the width of columns.
- c) In a spreadsheet you can only enter numbers and formulae
- d) Spreadsheet programs can generate a variety of charts and graphs.
- e) A spreadsheet displays information in the form of a table with a lot of columns and rows.

4. 1. A _____ database maintains separate, related files, but combines data elements from the files for queries and reports.

- a) Excel
- b) Interrelated
- c) Systematic
- d) Relational

5. SSD stands for

- a) Sofisticated Software Disk
- b) Solid State Drive**
- c) SD Saving Drive
- d) Sata Solid Disk

6. A database management system is used to

- a) store, organize and record data
- b) store, organize and retrieve data**
- c) store, organize and update data
- d) store HTML information

7. The information which is presented to the computer

- a) output
- b) Data
- c) main info
- d) input**

8. a system that combines hypertext and multimedia

- a) hypertext
- b) streaming
- c) hypermedia**
- d) interactive

9. Programs which can be used on a computer system

- a) Software
- b) Input
- c) WhatsApp
- d) Application

10. Section that holds programs and data while they are executed or processed

- a) hardware
- b) software
- c) RAM
- d) CPU

11. A tool that allows you to extract information that meets certain criteria.

- a) Search
- b) Access
- c) Query
- d) Sorting

12. Input devices attached to the CPU

- a) peripherals
- b) ports
- c) CPUs
- d) hard disks

13. Spreadsheet Program are used to

- a) to make calculations in the form of mathematical tables
- b) to write letters and faxes
- c) to create virtual meetings so that the participants can see and hear each other
- d) to store, manipulate and retrieve data

14. A unit of a database file made up of related fields.

- a) Database
- b) Record
- c) Relational
- d) N/A

15. Videoconferencing Programs are used to

- a) to make calculations in the form of mathematical tables
- b) to handle accounts and organize wages, taxes, payments, etc
- c) to create virtual meetings so that the participants can see and hear each other

16. The internet was

- a) probably created in the USA
- b) Popular in the 1960s
- c) Invented in the mid-90s
- d) to exchange messages with clients and colleagues

17. What feature allows an electronic device to be used as soon as it is connected to a computer?

- a) USB
- b) Electronic sensor
- c) Flash Drive
- d) Plug and Play

18. If you want to move a file to a different location, what do you do?

- a) Cut
- b) Paste Copy
- c) Drag and drop

19. The Main functions of the Operating System are:

- a) Preventing programs and users from communicating with hardware
- b) Dealing with input/output operations
- c) Multi-tasking
- d) Running programs

20. Database Management System

- a) to handle accounts and organize wages, taxes, payments, etc
- b) to store, manipulate and retrieve data
- c) to exchange messages with clients and colleagues
- d) to make calculations in the form of mathematical tables

21. The geographical region covered by one or several access points is called a

- a) hotspot
- b) wireless access point
- c) wireless network device

22. Multi-tasking means.

- a) Running many tasks at the same time
- b) Multiplying Tasks on the computer
- c) Tasks that can be done in many ways.

23. The standard protocol that allows computers to communicate over the internet is called

- a) TCP/IP
- b) an IP address

- c) HTTP
- d) Ad-hoc

24. Which device converts computer data into a form that can be transmitted over phone lines?

- a) Wireless
- b) a mobile phone
- c) a modem
- d) ADSL

25. Business Accounting Package

- a) to make calculations in the form of mathematical tables
- b) to make calculations in the form of mathematical tables
- c) to display information in the form of slide show
- d) to handle accounts and organize wages, taxes, payments, etc

26. Word Processor

- a) to handle accounts and organize wages, taxes, payments, etc
- b) to exchange messages with clients and colleagues
- c) to write letters and faxes
- d) to create virtual meetings so that the participants can see and hear each other

27. Technologies and applications that integrate different media: text, sound, video, graphics and animation.

- a) multimedia
- b) interactive
- c) sound card
- d) hypermedia

28. Results produced by a computer

- a) peripherals
- b) software
- c) Ports
- d) output

29. Sockets into which external devices may be connected

- a) Hard drive
- b) output
- c) ports
- d) peripherals

30. Text with links which take you to other pages

- a) paged text
- b) hypermedia
- c) interactive
- d) hypertext

31. A system in which users interact with a simulated world

- a) streaming
- b) virtual reality
- c) hypermedia
- d) multimedia

32. The powerline internet provides broadband access through

- a) electrical power lines
- b) telephone lines
- c) satellites

33. A technique for playing sound and video files while they are downloading.

- a) hypermedia
- b) streaming**
- c) interactive
- d) virtual reality

34. A collection of data stored in a PC in a systematic way is

- a) fields
- b) records
- c) files.
- d) database**

35. 1. Which term describes any fast, high-bandwidth connection?

- a) Broadband**
- b) Dial-up connection
- c) Wifi-connection

36. Physical parts that make up a computer system

- a) peripherals
- b) hardware**
- c) hard drive
- d) hardship

37. Some companies have several computers sharing a database over a

- a) Network**
- b) USB
- c) Cable
- d) Internet

38. means the programme allows the user to get involved and choose to watch, listen or write.

a) interactive

b) hypertext

c) multimedia

d) virtual

39. It is considered the brain of the computer

a) CPU

b) hard drive

c) main memory

d) software

40. What sort of locations or access points can be used to surf the Net without wires?

a) Wireless Hotspots

b) WAN Access Points

c) MAN

d) LAN
